MEETING MINUTES

Write down the subjects discussed during the meeting and clearly indicate assigned tasks, actions planned, deadlines that is advised/planned to be executed below.

3. Topics, Issues discussed during the meeting and Decisions taken
1. We have almost finalized our project with the additions of pull functionality, branching feature. The remaining developments (i.e. merge & diff view and merging) are underway.
2. We have resolved the issue that we previously shared with advisors in the previous meeting, that the RevitAPI lacked native create functions for certain objects needed for pull functionality to work. We have used the workaround we suggested, copying the generic object templates, modifying their parameters and placing them at specific locations.
3. The instructor mentioned the upcoming presentation, demo and CSFair program. He suggested planning our physical demonstration setup to showcase our application during the demo session and the CSFair.
4. The instructor told us to finalize the coding so that no dramatic changes will be done after the submission of the report,
5. The instructor outlined the requirements for the Final Report due this Friday at 10.00 am. He suggested to give high emphasis on Maintenance and Software Details parts in the report.
